

¥MG Crested Carburetor Caps¥
One Pair. For 1929-1974 MG's
Part #P 1094

Installation Instructions for MG Crested Carburetor Caps

CAP & DAMPER ASSEMBLY

1. Remove one carburetor cap & damper assembly from your car.
2. The cap must now be separated from its rod. Be very careful not to bend the rod! Instructions below show how to pull it out straight.

A. If your present cap is plastic, you may be able to pull it off by hand. If you cannot, then follow instructions for brass caps, below.

B. If your present cap is brass, clamp it in a vise (use a leather scrap to prevent marks on original), apply locking pliers firmly and flush with the damper fittings, then lift the rod free with a claw hammer (see illustration).

(Now see page 2...)
